EXPLORE THE POSSIBILITIES >>>

CASUAL JOB OPPORTUNITY For Final year/Masters students

Avaya is a global leader in communications networks for more than one million businesses around the world, including 90% of the FORTUNE® 500. A world leader in secure and reliable Internet Protocol (IP) telephony systems, communications software applications and services, businesses rely on Avaya for reliable, secure networks that facilitate customer relationships, enhance productivity and maximize profitability.

Avaya Labs, the Research and Development arm of Avaya, requires a motivated and creative **Casual Staff** (available to work **3 days/week**) to carry out a wide range of duties which mainly include:

- >>> Designing and Executing Development Test Plans
- >>> Installing Operating Systems, OS images and Software
- >>> Submitting bug reports
- >>> Reporting of Test Status
- >>> Software development of Testing systems

This is an exciting opportunity to gain valuable experience in a Multinational Telecommunications Research and Development company.

The following attributes would be highly regarded for this position:

- >>> Previous Software Testing experience
- >>> Open Minded, Inquisitive and a Team player
- >>> Good attention to detail
- >>> Knowledge of Java required. Understanding of JUnit, Web services and XML messaging desirable.

Interested candidates should forward their **Curriculum Vitae and Academic Transcript** to auslabsjob@avaya.com with title '**Apollo Jobs 2006**' by **Friday May 5th 2006**. Submissions that do not include both Curriculum Vitae and Academic Transcript will **NOT** be considered.
